

2" Pylon Tape Instruction Sheet

2" Clear Vinyl strips are used as adhesive to hold graphic in place.
Dotted lines represent where the clear vinyl adhesive would go.

For video tutorial go to: https://youtu.be/dSZBdE_1Qd8

To install this pylon, please follow these steps:

- (1) Clean perimeter of existing sign so that the tape will adhere to the sign cabinet.
- (2) Tack graphic in place using masking tape
 - * Use tape on corners and middle of pylon to make the install easier.
- (3) Make sure you keep tension on the printed piece while applying the tape so it doesn't buckle or wrinkle.

****Note: Pylon graphics have adhesive on the back, however it is strongly recommended to use the 2" tape so removal at the end of the season is successful.***
